Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the Application:

Listing of Claims:

- 1. (Currently Amended) A retention system for a hand tool combination
- 2 having a primary tool and a secondary tool, comprising:
- a first retainer magnet having a first polarity coupled to the primary
- 4 tool;
- a second retainer magnet having a second polarity coupled to the
- 6 secondary tool;
- wherein the first retainer polarity and the second retainer polarity are
- 8 configured for attraction by a magnetic force;
- so that the secondary tool is retained in connection with the primary
- tool.
- (Currently Amended) The retention system of Claim 1 wherein the
- 2 first retainer comprises a first magnetic member magnet is fixed to the primary tool.
- 1 3. (Currently Amended) The retention system of Claim 2 wherein the
- second retainer comprises a second magnetic member magnet is fixed to the
- 3 secondary tool.
- 4. (Currently Amended) The retention system of Claim 3 wherein the
- first magnetic member magnet has one of a first positive polarity and a negative
- polarity and the second magnetic member magnet has the other of the positive polarity
- and the negative a second polarity opposite from the first polarity.
- 5. (Currently Amended) The retention system of Claim 1 wherein the
- first retainer magnet is substantially aligned with the second retainer magnet when the
- secondary tool is retained in a stowed position within a in the receptacle of the
- 4 <u>primary tool</u>.

1	6.	(Original) The retention system of Claim 1 wherein the primary tool is
2	an axe.	
1	7.	(Original) The retention system of Claim 6 wherein the secondary tool
2	is one of a kr	nife and a saw.
1	8.	(Currently Amended) The retention system of Claim 1 wherein the
2	first magnet	is at least partially offset from the second magnet retainer comprises a
3	magnetic ma	terial and the second retainer comprises a metallic material responsive to
4	magnetic attr	
1	9.	(Currently Amended) The retention system of Claim 1 wherein the
2	offset is suff	cient to maintain a magnetic attraction to draw the secondary tool toward
3	a stowed pos	ition in connection with the primary tool first retainer comprises a
4		erial responsive to magnetic attraction and the second retainer comprises
5	a magnetic n	
1	10.	(Currently Amended) A combination hand tool having a primary hand
2	tool configur	red for storage of a secondary hand tool therein, the combination hand
3	tool compris	ing:
4		a receptacle formed within an elongated handle member of the primary
5	hand tool;	
6	•	a first magnetic member magnet having a first polarity coupled to the
7	primary hand tool;	
8		a second magnetic member magnet having a second polarity opposite
9	the first pola	rity and coupled to the secondary hand tool and configured to operably
10	engage the fi	rst magnet magnetic member;
11	•	so that the secondary hand tool is retained within the receptacle by a

11

12

magnetic force.

- 1 11. (Currently Amended) The combination hand tool of Claim 10 wherein
 the primary hand tool is an axe and the secondary hand tool is one selected from the
 group consisting of a camping gear item, a survival gear item a fishing gear item, a
 hiking gear item, and a fishing gear item.
- 1 12. (Withdrawn) The combination hand tool of Claim 10 wherein the first 2 magnetic member is coupled to an actuatable member configured to alternate a 3 polarity of the first magnetic member for interfacing with the second magnetic 4 member.
- 1 13. (Withdrawn) The combination hand tool of Claim 12 wherein the actuatable member is a thumbwheel.
 - 14. (Withdrawn) The combination hand tool of Claim 10 wherein the first magnetic member and the second magnetic member are operable to at least partially withdraw the second hand tool from the receptacle.
 - 15. (Original) The combination hand tool of Claim 10 wherein the magnetic force is a minimum of approximately 4000 gauss.
 - 16. (Currently Amended) The combination hand tool of Claim 10 wherein the first magnetic member magnet is fixed to the primary hand tool and the second magnetic member magnet is fixed to the secondary hand tool.
- 17. (Currently Amended) The combination hand tool of Claim 10 wherein
 the first magnetic member magnet and the second magnetic member magnet are
 configured in substantial alignment when the secondary hand tool is retained within
 the primary hand tool.
 - 18. (Currently Amended) The combination hand tool of Claim 10 wherein the first magnetic member magnet and the second magnetic member magnet are configured in at least a partially offset relationship when the secondary hand tool is retained within the primary hand tool.

1	19.	(Withdrawn) The combination hand tool of Claim 12 wherein the
2	actuatable me	ember is configured for rotational movement.
1	20.	(Currently Amended) A system for storing a first object in connection
2	with a second	d object, comprising:
3		a first retainer having a first magnetic member magnet with a first
4	polarity coup	led to the first object;
5		a second retainer having a second magnetic member magnet with a
6	second polari	ity coupled to the second object and configured to eoact with attract the
7	first retainer by a magnetic attraction;	
8		so that the first retainer and the second retainer are operable to retain
9	the second of	oject in connection with the first object until the second object is removed
10	by overcoming the magnetic attraction a user.	
	21.	(Original) The system of Claim 20 wherein the first object is a hand
1	tool.	(Original) The system of Claim 20 wherein the first object is a mand
2	1001.	
1	22.	(Withdrawn) The system of Claim 20 wherein the first retainer is
2	configured to	be actuatable between a first position for retention of the second object
3	and a second	position for extraction of the second object.
		position for extraction of the second object.
1	23.	(Withdrawn) The system of Claim 22 wherein the first magnetic
1		
	member and	(Withdrawn) The system of Claim 22 wherein the first magnetic the second magnetic member are attracted in the first position.
	member and 24.	(Withdrawn) The system of Claim 22 wherein the first magnetic the second magnetic member are attracted in the first position. (Withdrawn) The system of Claim 23 wherein the first magnetic
	member and 24.	(Withdrawn) The system of Claim 22 wherein the first magnetic the second magnetic member are attracted in the first position.
2	member and 24.	(Withdrawn) The system of Claim 22 wherein the first magnetic the second magnetic member are attracted in the first position. (Withdrawn) The system of Claim 23 wherein the first magnetic
1 2	member and 24. member and 25.	(Withdrawn) The system of Claim 22 wherein the first magnetic the second magnetic member are attracted in the first position. (Withdrawn) The system of Claim 23 wherein the first magnetic the second magnetic member are repelled in the second position.
2 1 2	member and 24. member and 25. magnetic me	(Withdrawn) The system of Claim 22 wherein the first magnetic the second magnetic member are attracted in the first position. (Withdrawn) The system of Claim 23 wherein the first magnetic the second magnetic member are repelled in the second position. (Currently Amended) The system of Claim 20 wherein the first

each other.

- 1 26. (Original) The system of Claim 20 wherein the first object comprises 2 an elongated member providing a receptacle and the second object is configured for 3 retention within the receptacle.
- 1 27. (Currently Amended) The system of Claim 26 wherein the first object 2 is a camp axe and the second object is one selected from the group consisting of a 3 knife, a saw, a cooking utensil, a compartment, a camping gear item, a hunting gear 4 item, a fishing gear item and a survival gear item.
- 1 28. (Currently Amended) In an apparatus comprising a first hand tool
 2 having a receptacle and a second hand tool configured for storage within the
 3 receptacle, the improvement comprising a retention system having a first retainer
 4 magnet with a first polarity coupled to the first hand tool and a second retainer magnet
 5 with a second polarity coupled to the second hand tool, where the first retainer
 6 polarity and the second retainer polarity are configured for magnetic attraction, so that
 7 the second hand tool is retained within the receptacle until removed by a user.
- 1 29. (Original) The apparatus of Claim 28 wherein the first hand tool 2 comprises a first cutting tool and the second hand tool comprises a second cutting 3 tool.
 - 30. (Currently Amended) The apparatus of Claim 28 wherein the first polarity is one of a positive polarity and a negative polarity comprises retainer comprises a first magnetic member.
- 31. (Withdrawn) The apparatus of Claim 30 wherein the first retainer is configured to alternate the polarity of the first magnetic member relative to the second retainer.
 - 32. (Withdrawn) The apparatus of Claim 31 wherein the first magnetic member is configured for rotation.
 - 33. (Original) The apparatus of Claim 28 wherein the second retainer comprises a second magnetic member.

- 1 34. (Withdrawn) The apparatus of Claim 28 wherein the first retainer is
- 2 actuatable between a first position for retention of the second hand tool within the
- 3 receptacle and a second position for withdrawal of the second hand tool from the
- 4 receptacle.
